Bill Satterfield DMH/DD/SAS

<u>DISTRIBUTION</u>: All Institutions, Raleigh Office and Other Interested Groups

PUBLICATION DATE: January 2022

INTRODUCTION

In recent years there have been two separate reports(Annual Statistical Report for LMEs and the Admissions Report for LMEs) that have provided descriptive statistics and trends in the public community mental health system in North Carolina. In an effort to provide a single source of information that adequately describes the type of clients served at the clinical, demographic and geographic level these two reports have been combined into a single report for State Fiscal Year 2021. While similar in format and table construction to the previous reports, the intent of this report is to provide an integrated look at major service indicators and measures.

State Totals, Fiscal Year 2021, 2016, 2011								
]	Fiscal Yea	r	Percent Change				
Indicators	FY21	FY16	FY11	FY21 vs. FY16				
Active Caseload Start of								
Fiscal Year	230,027	265,771	239,011	-13.45%				
Total Admissions	90,067	114,579	121,169	-21.39%				
Total Terminations	77,863	127,761	149,214	-39.06%				
Active Caseload End of								
Fiscal Year	242,231	252,589	210,966	-4.10%				
Persons Served	320,094	380,350	360,180	-15.84%				

Figure 1 Selected Indicators and Percent Change Over Time State Totals, Fiscal Year 2021, 2016, 2011

TABLE I

Client Activity and Utilization (Table I) reflects admission rates, active caseload at the beginning of the fiscal year, total admissions and the total number of persons served by the LME-MCO. There were **221,812** active cases on July 1, 2020 and **74,465** total admissions (first and readmissions combined) during the fiscal year. A total of **296,277** persons were served during fiscal year 2021 as indicated by adding first and readmissions to the active cases (excluding those on Inactive Status and TASC Clients) on July 1, 2020. Graph 1 depicts the number of clients served at the LME-MCO for the last ten years.

Admission rates reflect the total number of admissions to an LME-MCO during the fiscal year per 100,000 population in the catchment area. Admission rates are useful in that they allow comparisons among geographic areas as well as special population subgroups by adjusting the effects of population size. Admission rates were selected instead of utilization rates because of their greater accuracy.

The statewide admission rate was **699** admissions per 100,000 population. The admission rate ranged from a low of **332** per 100,000 reported by Alliance Behavioral to a high of **1,048** per 100,000 population reported by Trillium.

TABLE I CLIENT ACTIVITY AND UTILIZATION BY NAME NORTH CAROLINA LMES FY2020-2021

	ADMISSION RATE*	ACL 7/1/2020	TOTAL ADMISSIONS	TERMINATIONS	PERSONS SERVED
Alliance Behavioral	332	40,581	6,614	2,380	47,195
Cardinal Innovations	684	25,872	22,268	20,132	48,140
EastPointe	509	36,425	3,378	1,052	39,803

Sandhills	946	37,696	10,787	14,333	48,483
Trillium	1,048	19,120	15,813	12,373	34,933
Vaya	816	28,015	8,676	6,887	36,691
STATE TOTAL	699	221,812	74,465	62,055	296,277

* Rate per 100,000 N. C. Populaton (2021 Population Estimate.) Admission Rate = Total Admissions / Population x 100,000.

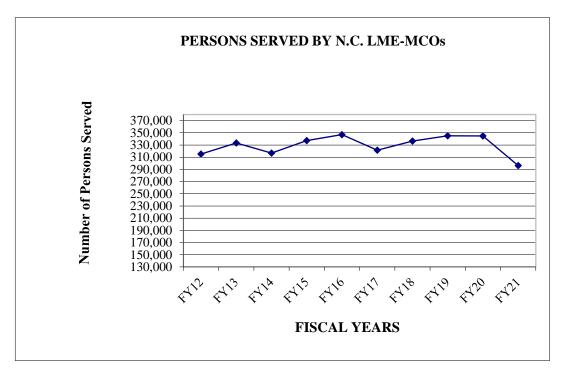

Please Note: There is a difference in Total Admissions, Terminations and Persons Served from the previous pages (Figure 1), when compared to the State Total in Table 1. The reason for this difference is that TASC clients are included in Figure 1, but not Table 1. TASC clients were not included in Table 1 as they are not associated with an LME.

This graph reflects the number of persons served by the **7** LME-MCOs for the time period FY2012 through FY2021. This data reflected in this graph does not include persons on inactive status.

A total of **296,277** clients were served by LMEs during **FY2021** representing a **-6.03** % decrease over the **315,284** during **FY2012**.

TABLE 2

Table II reflects the number of persons served in each of the LME-MCOs by age and disability. The age of the client was calculated as of 6-30-21 and the disability of the client was based on the diagnosis assigned to the client on the NCTRACKS paid claim.

A total of **320,094** persons were served in the LME-MCOs and TASC during FY21. Persons Served is calculated by totaling the active caseload on July 1, of the fiscal year (excluding those clients on Inactive Status) and all admissions.

Of the **320,094** clients served, **68** percent (**218,909**) were mentally ill, **5.11** percent (**16,342**) were developmentally disabled, and **26.51** percent (**84,843**) were substance abusers. Within each disability the percent of children served (0-17) ranged from **0.22** percent (**183**) of substance abusers, to **18.45** percent (**3,015**) of the developmentally disabled. The percent of children served in the mental health category was **11.65** percent (**25,513**).

TABLE 2B

Table 2B reflects the number of persons served for each county that falls within the LME-MCO's catchment area. Table 2 on the other hand reflects number of persons served by the LME-MCO regardless of the county of residence.

This difference is pointed out in case the reader is trying to compare the two tables.

TABLE 3

The data reflected in this table included admissions by diagnosis and marital status. The aggregate groupings of diagnosis are based on the ICD9 and ICD10 (International Classification of **Diseases**, 9th **Revision Clinical Modification**, International Classification of **Diseases**, 10th **Revision Clinical Modification**)

Of the diagnosis reported at the time of admission, substance abuse (**31,138**) accounted for (**34.6%**) of all admissions. However, when looking at Psychiatric Diagnosis only, which represented (**55.02%**) of all diagnosis, major depressive disorders (**14,108**) accounted for (**15.7%**) of all admissions. There were (**7,319**) alcohol abuse admissions which accounted for (**8.1%**) of all admissions.

In the marital category, the largest group is those who are single, representing **70.6%** of all admissions.

** DERIVED FROM ICD-9 and ICD-10 CODING

TASC ADMISSIONS ARE INCLUDED IN TABLE 3.

TABLE 3A

The data in this table reflects admission characteristics by race, sex and age categories.

Males represented the majority of the total admissions **60.0%** with females representing **40.0%** of the total admissions.

When looking at race categories during FY20 non-white admissions numbered **30,837** or **34.2%** of the total reported. Of the non-white admissions reported **1.5%** was American Indians.

The age group composition of LME-MCO's admissions reflects that **31.6%** fell within the 25 to 34 age group. When admissions are grouped by the three major age groups, **8.9%** were 0-17, **89.0%** was between 18-64 years of age and **2.0%** were 65 years and older.

Figure 3 Admissions Rate Per 100,000 Populations * By Age Group by LME-MCO, FY2020-2021

* Admissions rate = (Admissions/Population) x 100,000

TABLE 3B

Table 3B reflects the duplicated number of admissions for each of the LME-MCO's by age and disability. The age of the client was calculated on the admission date and the disability of the client was based on the diagnosis assigned to the client on the NCTRACKS Paid Claims.

Of the **90,067** clients admitted, **55.24**% (**49,755**) were mentally ill, **0.86%** (**778**) were developmentally disabled, and **43.89%** (**39,534**) were substance abusers. Within each disability the percent of children served (0-17) ranged from **0.42%** (**167**) of substance abusers, to **53.86%** (**419**) of the developmentally disabled. The percent of children served in the mental health category was **15.00%** (**7,465**).

TABLE 4

This table includes selected indicators for all terminations while the proceeding four tables focused on admissions. This table was included since diagnostic classification may change during the course of treatment and final diagnosis should be more accurate.

The relationships described for admission diagnosis remained true for termination diagnoses, although absolute numbers and percentages changed. Substance abuse accounted for **35.0%** of terminations versus **34.6%** of admissions. Adjustment disorders accounted for **5.5%** of terminations versus **5.2%** of admissions while major depression disorders accounted for **14.9%** of terminations versus **15.7** % at admission.

Table 5 reflects the unduplicated count of persons served in each of the LME-MCO's by age and disability. The age of the client was calculated as of 6-30-21 and the disability of the client was based on the diagnosis assigned to the client on the NCTRACKS Paid Claims.

A total of **312,824** persons were served in the LME-MCO's during FY2021. Persons Served is calculated by totaling the active caseload on July 1, of the fiscal year (excluding those clients on Inactive Status) and all admissions.

The screening process was discontinued on 7/1/2016 and data are no longer available for this table.

The data in these tables reflects the drug of choice for all 39,534 LME/TASC admissions with a substance abuse principal diagnosis.

Alcohol was the drug of choice for (10,365) admissions which represented 26.22% of all substance abuse admissions. Heroin was the drug of choice (8,028) admissions which represented 20.31% of all substance abuse admissions. Marijuana/Hashish (Cannibus) was the drug of choice for (7,288) admissions which 18.43% of all substance abuse admissions.
