INTRODUCTION TO EXPENDITURE REPORTS

SECTION I

Division of Aging (DA) produced the first County Data Reports in February 1992, pursuant to N.C.G.S. 143B-181.1A. While the presentation of data has evolved over time, the report continues to provide essential demographic and service utilization information for North Carolinians age 60 and over. These reports support County Planning Committees in developing plans for the use of Home and Community Care Block Grant (HCCBG) funds.

Each county in North Carolina has the flexibility to determine how HCCBG funds are allocated, including which services to fund, the amount of funding for each service, and which agencies will provide those services. The opportunity of counties to influence the availability of services grew during the 1990's largely because of increases in State funding for home and community-based services for non-Medicaid eligible older adults. These funds, coupled with the expansion of Medicaid eligibility to 100 percent of the federal poverty level, enabled more meaningful local planning. As public funding has remained constant or even diminished at times, the decisions on how best to use the HCCBG funds have become more challenging and important. This is particularly true in the current climate, as both the state and counties face the growing population of older North Carolinians.

The data in these reports should be considered alongside other relevant information to inform key decisions in funding aging services. Additional factors to consider include client "waiting list" data, local indicators of service needs (such as adult protective services cases), current budget utilization by funding sources, availability of alternative funding, service costs, demographic profiles of clients, client satisfaction with services, and evaluations of the current service providers. Area Agencies on Aging (AAA) can assist County Planning Committees in gathering necessary information to make well-informed decisions.

Questions about the descriptions of services or clarifications needed regarding the information included in this package should be directed to the Division's Planning and Systems Support Section staff: Swarna Reddy (Swarna.reddy@dhhs.nc.gov) and/or Divya Venkataganesan (Divya.venkataganesan@dhhs.nc.gov).

SECTION II

DEMOGRAPHIC DATA

This section highlights key sources of demographic data on North Carolina's older adults. While this information does not reflect all available Census data on this population, it provides a comprehensive overview of the most frequently requested data.

The web sites listed below provide other key demographic data on North Carolina's older adults.

1. The NC Office of Budget and Management maintains considerable demographic, economic, and other data on NC counties. <https://www.osbm.nc.gov/facts-figures>
2. The US Census Bureau maintains data on population, economic, social and housing characteristics. <https://data.census.gov/cedsci/>
3. The US Administration of Aging (AoA), now part of the Administration for Community Living (ACL) since 2012, maintains data on the characteristics of older Americans through data collection and research projects funded by ACL. Its Aging Integrated Database (AGID) is an on-line query system based on ACL-related data files and surveys and includes population characteristics from the Census Bureau for comparison purposes. In addition, its State Profiles provide key data elements from Older Americans Act programs and services and other features. <https://acl.gov/aging-and-disability-in-america/data-and-research>
4. The Division of Aging website features a section called "Facts, Figures and Reports" which includes both state and county statistical profiles and other special reports. <https://www.ncdhhs.gov/divisions/aging/facts-figures-and-reports>
5. The Division of Aging **All Ages, All Stages NC** dashboard provides data on demographics, health and well-being, economic security, social engagement and community support, offering a comprehensive view of aging across the lifespan <https://www.ncdhhs.gov/divisions/aging/facts-figures-and-reports>

SECTION III

STATE SERVICE UTILIZATION DATA

The primary purpose of this section is to illustrate the statewide programs/services utilization by North Carolina's older adults. For SFY 2024-25, seven different State agencies provided service data on people aged 60 and older.

To assist with the county's service planning for the aging population, the various services available from these state agencies have been assigned to a major service category. These categories are defined as follows:

Description of Categories Code

- 1 Adult Care Homes - Includes: Special Assistance payments for residents of adult care homes and Medicaid expenditures for personal care services (PCS-basic and enhanced), care management and screening.
- 2 Economic Support - Programs and services that provide an indirect financial support, without which a cash outlay by the recipient would be required.
- 3 Hospitals, Physicians, and Other Health Care - Services that provide a variety of health care to recipients outside their home.
- 4 Home Health and In-Home Care - Services that provide health and related care to recipients in their home.
- 5 Institutional Care - Services provided to residents of nursing homes, mental health facilities, and hospitals.
- 6 Social Support - Services that provide social and/or other support to recipients inside or outside their home.

The North Carolina State Expenditure Report provides a summary of services and expenditures from seven different reporting agencies in the state. The specific services that comprise the major service categories (above) are cross-referenced by code numbers. The reported expenditures generally represent the federal, state, and minimum local share for services provided to individuals aged 60 and older by the contributing funding sources. Total expenditures for DA include consumer-contribution revenues reported as well as U.S. Department of Agriculture (USDA) reimbursement for meals provided through HCCBG. Additionally, the County Expenditure Report provides the expenditures reported by the seven agencies, broken down by the six service categories for all counties.

Each contributing state program shares the common goal of providing services to North Carolina's older adults. However, the only common data element reported across these agencies is expenditures. While expenditure data has been collected in this manner since SFY 1991-92, there are typically several changes each year. Below are key reminders and noted changes:

1. State/County client information may not be available for every service with an expenditure, in which case the client total will be left blank. In situations where the number of clients served is two or fewer, the client numbers are left blank to maintain client confidentiality.
2. The sum of the county unduplicated counts may not equal the statewide unduplicated counts for the DA. This discrepancy occurs because the state data reports on unduplicated client counts for the entire state, while county data reflects unduplicated client counts at the county level. If a person receives the same service in two different counties, they will be counted once in the state report but will be reported as a unique count in each of the county's services they received.
3. DA received state appropriations for Project C.A.R.E. (**C**aregiver **A**lternatives to **R**unning on **E**mpy), a program which was available statewide in SFY 2015-16 to people caregiving for individuals with Alzheimer's disease and related dementias. Funding supports providing information, assistance, and referral for supports as well as individualized Care Management through the trajectory of their caregiving role. Since this program serves caregivers of all ages in the state, service expenditure data is not included for each county.
4. Since SFY 2015, the HCCBG service "Information and Assistance" has been renamed to "Information and Options Counseling".
5. Health Promotion/Disease Prevention data includes expenditures related to health screening, health promotion, and disease prevention programs.
6. The DA Aging Resources Management System (ARMS) does not distinguish between service dollars and administrative dollars. Therefore, for programs like Project C.A.R.E. and the Family Caregiver Support Program, the county expenditure amount may not reflect where the direct services take place.
7. This year, the DA reports include expenditures from ARPA (American Rescue Plan Act) funds received from ACL. This funding to the aging services network in every state and territory will help provide meals and other nutrition services, support family caregivers, help older adults connect and engage with others to reduce social isolation, re-open senior centers, and help residents of nursing homes resolve complaints. The reports also include the SFRF (State Fiscal Recovery Fund) which is part of ARPA to support in recovery from the impacts of the COVID-19 pandemic and also PEAS (Providing Elders Additional Sustenance) project expenditures.
8. As of March 2024, the Division of Aging and Adult Services was restructured and became the "Division of Aging" with the Adult Services Section integrated into the Division of Social Services. This change aims to strengthen the state's ability to support county DSS offices by providing enhanced training, additional resources, and more robust Continuous Quality Improvement (CQI) coaching.
9. Data for the Department of Transportation's Elderly and Disabled Transportation Assistance Program (EDTAP) cover both older adults and individuals with disabilities. In SFY 2011-12, two Regional Transit Systems were established through state legislation (Article 25 & Article 26) to provide transportation services: (1) Albemarle Regional Health Services (ARHS) serving Camden,

Chowan, Currituck, Pasquotank and Perquimans and (2) the Western Piedmont Regional Transit Authority (WPRTA) serving Alexander, Burke, Caldwell and Catawba counties. For these counties, expenditure data were not available at the individual county level, and instead, the aggregate amount for all counties is shown in the expenditure reports. EDTAP funds for Macon County were transferred to Job Access Reverse Commute Program (JARC), so no expenditure data is available for that county. Watauga County is served by Appalachian Campus Area Rapid Transit (AppalCart).

10. As of August 2018, the Division of Medical Assistance became Division of Health Benefits (NC Medicaid).
11. As of October 2023, the Division of Vocational Rehabilitation became Division of Employment and Independence for People with Disabilities.
12. Energy Assistance: The report includes data from two Division of Social Services programs—Low Income Energy Assistance Program (LIEAP) and Crisis Intervention Program (CIP)—both federally funded to provide energy assistance.
13. The Special Assistance Service is divided into two categories.
 - Special Assistance Adult Care Home: This service pays the room and board for eligible residents of adult care homes. The program serves adults 18 and older. Data for 60+ are reported here.
 - Special Assistance In-Home Program: Although the data included in this report reflect only the 60+ population, this service provides an option for in-home care for eligible older people and adults with disabilities who are at risk of placement in an adult care home but who desire to live in a private living arrangement and can be maintained safely in that setting.

This year, the reports do not reflect Special Assistance expenditure due to lack of data at the time of reporting.

Other state government funding sources provide services to benefit older adults, but their data collection and reporting systems are not designed to provide age-specific information. These contributing state funding sources shown in this package reflect programs administered by the State that have a direct impact on older adults. Because the state and local governmental units have some control and influence with the administration of these services, it is important to focus on these services when addressing the local needs of older adults.

The direct payment of Social Security benefits to older adults clearly represents the largest expenditure of public funds. Expenditures for Medicare, Supplemental Security Income (SSI), Veterans and other federal benefits would overshadow the programs administered by the state. Although not reflected in the reports, the availability of these federally administered programs should be considered when addressing the needs of older adults. The data tables also do not take into consideration special grant-funded projects that are either time-limited and/or geographically limited (for example, Senior Farmers' Market Nutrition program).

SECTION IV

COUNTY SERVICE UTILIZATION DATA

Expenditures under HCCBG does not include significant local expenditures reported over and above the minimal match requirements. However, county expenditures for the DA do include consumer-contribution revenues that are reported.

While funding through DA for home and community services has generally remained consistent, there is some value for local decision-makers in comparing this year's County Data Reports with information from previous year. Comparing the growth (or decline) in a county's general older population, those with low income, etc. can help identify the relative size and scope of services needed. Some comparisons of per capita expenditure (divide expenditures by total population group or actual people served) may help illustrate the county's response to identified service needs. If per capita expenditure (by total population) falls, this could indicate that the county is having difficulty keeping pace with population growth and/or inflation. Conversely, changes in per capita expenditures by people served could suggest changes in how the services are delivered, such as who is being served, the intensity of service, and/or improved program efficiencies.)

County planning committees are encouraged to have candid and open discussions about this data, considering the best strategies to meet the needs of older adults. The Division especially wishes to emphasize the importance of citizen and consumer input throughout the HCCBG funding planning process for consideration by the county commissioners. Counties should conduct this work in a manner that avoids any appearance of conflict of interest with respect to service providers.

The Area Agency on Aging (AAA) can play a key role in helping counties analyze and interpret this data. Additionally, the AAA can provide insights into how funds for services such as family caregiver support and health promotion are being utilized within the region. The county expenditure data for these services and supports may not fully reflect the supports that are being made available to county residents through activities administered by Area Agency on Aging.

North Carolina State Aging Expenditures Report

Expenditures by Funding Source, Service and Service Category for Clients 60+ Years of Age: SFY 2024-2025
