Label:	MANDATORY
Domain:	
Type:	Char

Length:	2	**Precision:**	0		
Null Values:	0%	**Distinct Values:**	100%	**Average Length:**	1

Description The number of arrests in the 30 days preceding the date of admission or discharge to or from treatment. This item is intended to capture the number of times the client was arrested for any cause during the 30 days preceding the date of admission and or discharge to/from treatment. Any formal arrest is to be counted regardless of whether incarceration or conviction resulted and regardless of the status of the arrest proceedings at the time of admission. **It should be noted that this data field is primarily collected for Substance Abuse and Mental Health clients. Developmental Disability clients should be coded as a 98. Additionally, a threshold level of at least 90% of something other than unknown (97) will be monitored through the Performance Contract.**

00-96 Number of Arrests

97 Unknown

98 Not Applicable, Developmental Disability Target Population/Principal Diagnosis

Annotation
New data field effective 05/01/08.   This data field was added as a requirement of Federal Substance Abuse Block Grant reporting.

attn_self_help, column

Table Code:	CDW_DICTIONARY				
Name:	attn_self_help				
Code:	attn_self_help				
Label:	MANDATORY				
Domain:					
Type:	Char				
Length:	2	**Precision:**	0		
Null Values:	0%	**Distinct Values:**	100%	**Average Length:**	1

Description The number of times the client has attended a self-help program in the 30 days preceding the date of admission/discharge from treatment services. Included attendance at AA, NA, and other self-help/mutual support groups focused on recovery from substance abuse and dependence. **It should be noted that this data field is primarily collected for Substance Abuse and Mental Health clients. Developmental Disability clients should be coded as a 98. Additionally, a threshold level of at least 90% of something other than unknown (97) will be monitored through the Performance Contract.**

NOTE: This data field is called "Mutual Aid Program Attendance" on the new Adm/Disch Form.

Valid entries: 01   **No attendance in the past month**
               02   **1-3 times in past month** (less than once per week)
               03   **4-7 times in past month** (about once per week)
               04   **8-15 times in past month** (2 or 3 times per week)
               05   **16-30 times in past month** (4 or more times per week)
               06   **Some attendance, but frequency unknown**

               97   **Unknown**
               98   **Not Collected**

Unknown (97) Use this code if the State collects these data, but for some reason this record does not reflect an acceptable value.

Not Collected (98) Use this code if the State does not collect these data for submission to TEDS.

Any other entry sets the field to **Invalid** (99) during processing.

Guidelines: Use **Code 06** (frequency unknown) only if it is unknown that the client attended a self-help program during the month prior to admission/discharge, but there is insufficient information to record one of the specific frequency categories. Use **Code 97** (unknown) when it is not known whether the client attended a self-help program during the month prior to admission/discharge.

           This item is intended to capture the frequency with which the client attended self-help groups during the 30 days preceding admission or discharge from treatment. In the event treatment was initiated less than 30 days prior to discharge, this item refers to the frequency of attendance since the treatment was initiated.

           Use number of times attended self-help programs, not number of days, i.e., if a client attends self-help programs multiple times per day, let the number of times rather than the approximate times per week determine the response category. It the number exceeds 30 times in the prior 30 days, use the response category 16-30 times.

commit_status_ap, column

Description   (DISCONTINUE)

Axis codes refer to different classes of information as defined by DSM or ICD, including clinical syndromes, developmental and personality disorders, and physical disorders and conditions. Axis 1-3 are common diagnosis values and 4 is
problem classifications.

Axis I   = 1,
Axis II = 2,
Axis III = 3,
Axis IV = 4.

This is a one character alphanumeric field, no special characters allowed.

Diagnosis/axis specs for institution/CDW diagnosis crosswalk:

When we get diagnoses from the HEARTS system, this is how to generate an axis code and determine their group.
1. Any code in-group 1 is Axis 1 and DSM
2. Any code in-group 2 is Axis 2 and DSM
3. Codes in-group 3 are exception codes (there are about 10 of them) - each individual
   code has a special rule. TBD by user).
4. Codes in-group 4 are outside the DSM4 range - THESE MAY BE OBSOLETE, TBD
5. All other codes are Axis 3 - ICD9 codes.

Annotation

Data migration :
If the axis is blank, indicating old data, set the axis indicator to 1.
If the axis code is 1,2,3 move source code to target.
If the axis is 4 or 5 then don't write a CDW diagnosis record.

Post migration :
If axis code is not in the 'axis code' table reject record,
else move valid value to target.
Institutions:
Based on diagnosis code,
if code w/i set 1 then axis I,
if code w/i set 2 then axis II,
if code w/i set 3 then axis III,
if code w/i set 4 then axis I or II.

Label: MANDATORY
Domain: Type
Type: char(1)
Length: 1   **Precision:**   0
Null Values: 0%   **Distinct Values:**   100%   **Average Length:**   1

Description

Designation of the type of diagnosis i.e. Listed in order of importance : 1-9, A-Z

This is a 1-character alphanumeric field with no special characters allowed.

CDW
 1 = Principal Diagnosis
 2-9, A-Z = All other diagnoses

Annotation

Valid codes for Diagnosis Class (diagv_class) will continue to include:
        1=Principal Diagnosis

All other diagnoses would get the next incremental number 2 through 9, followed by A through Z thereafter.

For example, if an individual had a total of 12 diagnoses, the principal diagnosis would have a diagnosis class of 1; the additional 11 diagnoses would be classed as 2,3,4,5,6,7,8,9,A,B, and C.

Principal Diagnosis for CDW reporting is defined in accordance with the *Diagnostic and Statistical Manual of Mental Disorder, Fifth Edition (DSM-IV)* as follows:
  "When more than one diagnosis for an individual is given in an inpatient setting, the principal diagnosis is the condition established after study to be chiefly responsible for occasioning the admission of the individual. When more than one diagnosis for an individual is given in an outpatient setting, the reason for the visit is the condition that is chiefly responsible for the ambulatory care medical services received during the visit. In most cases, the principal diagnosis or the reason for the visit is also the main focus of attention or treatment."
