

# Crossroads Sandbox Resource

The Crossroads Sandbox [<https://crossroads-sandbox.ncdhhs.gov/app/crossroads.clinic.app.application>] is an environment designed for local agencies to practice Crossroads functions. It is not connected to the Production environment, so any actions performed in Sandbox will not affect real WIC participants. **IMPORTANT!** The Sandbox database does contain actual (and fake) WIC participant data. Phone numbers and email addresses have been masked (example: 111-111-1111) for security purposes but names, dates of birth and other Personal Health Information (PHI) remains visible. Therefore, treat Sandbox participant information as confidential, just as you would Production information. Screenshots or other communications containing PHI **must** be encrypted before sending. Documents or resources using screenshots from Sandbox **must** be from **fake families only**.

## User IDs

Each agency is assigned a user ID, see page 3. The password is the same for all local agencies and is updated by the Community Nutrition Services Section (CNSS) every 3 months. The password is **PracticeMore25!**. Future password updates will be sent through the Local WIC Director listserv or contact the CNSS Customer Service Desk (CSD) to obtain the password. The user ID and password can be used by multiple local agency staff at the same time. The user ID has a combined user role of CPA, Support Staff, Local Agency Calendar Templates and Breastfeeding Peer Counselor.

## Agency and Clinic Set Up

Agency and clinic set up should closely mirror Production but **may not match perfectly**. A Number-Based Appointment Template was applied by CNSS staff for each agency's main clinic but not satellite sites (if any) through May 31, 2024. Templates will need to be applied for future dates by local staff. Since this is a practice environment, these templates do NOT need to match your Production templates.

## Important Considerations:

1. For users to perform functions requiring a signature (Certification Signature, Breast Pump Issuance), an **electronic signature pad** must be installed.
2. eWIC interface is NOT included with the Sandbox. Users will not be able to practice EBT-related activities such as issuance, exchange, increase, void, adding or deactivating eWIC cards.
3. Food Setup matches Production as of March 20, 2024, but any changes to Food Setup after March 20, 2024 will NOT be reflected in the Sandbox.
4. When a Food Prescription is saved, a **Food Benefits Issuance Signature Confirmation/Unknown internal error** message will appear on the **Issue Food Instruments** screen. This occurs because the Sandbox is not connected to eWIC. Click **Sign Later** and then click **Cancel** (or navigate to another Quick Link) to leave the screen.
5. The Sandbox database is **not** refreshed. Participants with Certification End Dates that occurred in the past will have a Status of Expired OR a Status of Active/Certified and red dots. For this reason, Sandbox is more useful for creating **new** families. When attempting to complete a subsequent certification, staff may encounter user errors. **NOTE:** To practice a subsequent certification, transfer a participant **Into State** with a certification end date within 30 days. Then select the Subsequent Certification quick link.

The screenshot displays the user interface for the Crossroads Sandbox. At the top, it shows the 'Flower Family' with a Family ID of F00100006571 and an address in Burlington, NC. Below this, there are two icons representing participants: 'Rose' and 'Girl'. The 'Girl' icon has a red 'A' and a red dot, indicating a high-risk status. To the right, the 'Girl Flower' participant details are shown, including a Participant ID of 957053555P, an age of 5 years, and a WIC Category of Child. Below the participant icons is a 'Certification Details' section with a dropdown arrow and a help icon. This section contains a table with the following information:

Start Date	End Date
6/1/2023	3/26/2024
Priority	High Risk
V	<input type="radio"/> Yes <input checked="" type="radio"/> No

## Crossroads Sandbox Resource

### Suggested Scenarios to Practice in Sandbox:

- Certify (include care plan) and prescribe standard food package for a pregnant woman.
- Certify (include care plan) and prescribe standard food package for a non-breastfeeding woman and her fully formula fed infant.
- Certify (include care plan) and prescribe standard food package for a breastfeeding woman, her infant and two-year old child.
- Certify (include care plan) and prescribe exempt infant formula for a 7-month-old fully formula fed infant (mom is NOT a WIC participant). Prescribe the maximum amount (884 oz) and delete infant foods.
- Certify (include care plan) and prescribe a modified food package with lactose-free milk and 1 pound of cheese for a 2-year-old child (mom is NOT a WIC participant).
- Complete a Breastfeeding Peer Counselor care plan for the breastfeeding woman.
- Issue a breast pump to the breastfeeding woman.
- Add breast pumps to inventory (serialized and non-serialized).
- Add formula to inventory.
- Change status of dyad from fully breastfeeding to partially breastfeeding  $\leq$  MMA.
- Change status of dyad from fully breastfeeding to partially breastfeeding  $>$  MMA.
- Change status of dyad from fully breastfeeding to non-breastfeeding.
- Change status of dyad from partially breastfeeding  $\leq$  MMA to non-breastfeeding.
- Change status of dyad from non-breastfeeding to partially breastfeeding  $\leq$  MMA.
- Schedule appointments for all your families. Transfer them from satellite clinics to the main clinic to access the Master Calendar and Quick Appointments (or add templates to satellites).
- Add a foster child to an existing WIC family.
- Make a transfer Into State.
- Make a transfer Out of State and issue a VOC.
- Make a transfer Between Clinics.
- Make a transfer Between Families.
- View the Journal of Transactions for a certified participant.
