Support	

Overview

The NC-CORELS program works in either a standalone or network setup. When a network setup has been installed then any number of users may access the system from their local workstation. These instructions detail the setup of a new user of a network installation. This will install the required supporting files and the desktop icon to run NC-CORELS.

Prerequisites

These instructions assume that you have a network setup of the Maximus Ledger Suite already installed on your network and that NC-CORELS has been setup into that Maximus network installation. Refer to the instructions for installing NC-CORELS for more information.

Support Files Setup

The support files are required as part of the programming language used for NC-CORELS and the retired Maximus Ledger Suite so therefore we will be using the network setup from Maximus to install the support files.

The SETUP.EXE file to be run is located in the NETSETUP directory under your Maximus network installation. Locate the file and double-click on the icon to run it.

Figure 1 - Locate the network install of NC-CORELS or Maximus

When the program starts up the following screen will be shown. Just click the **Next** buttons until you get to the screen which asks for a Destination folder.

Figure 2 - Maximus Ledger Suite - Network Setup

Welcome	
	Welcome to the Maximus Ledger Suite Setup program. This program will install Maximus Ledger Suite on your computer.
	It is strongly recommended that you exit all Windows programs before running this Setup program. Click Cancel to quit Setup and then close any programs you have running. Click Next to continue with the Setup program.
	WARNING: This program is protected by copyright law and international treaties. Unauthorized reproduction or distribution of this program, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under law.

NC-CORELS New Network User Setup

Setup Complete	
	Setup has finished installing Maximus Ledger Suite on your computer. Setup can launch the Read Me file and Maximus Ledger Suite. Choose the options you want below.
	Click Finish to complete Setup.
	< Back Finish

Figure 12 - Setup Complete Screen

The support files have now been installed. Click the **Finish** button to complete the setup.

Setup User Workstation

Setting up NC-CORELS on the user workstation is a simple step of locating and running the **DMG_LAUNCHER.exe** file in the NC-CORELS network folder. This will run the NC-CORELS application and also create a program icon on the user's desktop.

Locate the DMG_LAUNCHER.exe file and double-click to run it.

Figure 13 - Locate DMG_LAUNCHER.exe

The NC-CORELS program will start.

Figure 14 - NC-CORELS Splash Screen

You can login to run the program. Check that data shows up as expected. You can now exit the application. An icon should have been created on the Windows desktop.

Creating the desktop icon

If you do not have the icon on your desktop then it can be created manually by following these steps:

1. Right click on an open area of the Windows desktop.

Figure 15 - Right-click on Windows Desktop

2. Type the network location of *DMG_LAUNCHER.exe* in the text box or click the **Browse...** button.
