North Carolina’s Aging Population

Division of Aging and Adult Services
Aging Population In North Carolina

Overview:

- Population estimates and projections
- Socio-economic characteristics
- Health and well-being
Estimates and Projections

There has been an impact on data collection in 2020 due to COVID. Because of this, state demographer for computing estimates and projections utilized a blended base of information that relies on much of the detailed characteristics data from the 2010 census – while maintaining the population totals reported from the 2020 Census. You may see considerable differences between these population projections and those produced previously.
Nationally, North Carolina ranks:

9th in total population

8th in population 65 and older

Total Population: 10,456,593     12,669,133    21% Increase

In 2020, one in six people were 65 and older. By 2028, one in five people will be 65 and older.

By 2031, there will be more people 65+ than children under 18.

Population **85 and older** will have the fastest growth in the next 20 years.

As the population 85 and older age, the prevalence of **functional limitations, frailty, and chronic diseases** increase creating significant impact on **long-term supports and services**.

The state has more adults 60 and older than children under age 18

Number of counties with adults 60 and older than age 0-17 will increase

Counties with more people age 60 and older than 0-17, 2020

85 Counties with more people age 60+ than 0-17
15 Counties with more people age 0-17 than 60+

Counties with more people age 60 and older than 0-17, 2040

90 Counties with more people age 60+ than 0-17
10 Counties with more people age 0-17 than 60+

Counties with more people age 60 and older than 0-17

2020

85 Counties have more people 60 and over

2040

90 Counties will have more people 60 and over

Percent of population 65 and older, 2020

Proportion of 65 and over in the state is 17%

Percent of population 65 and older, 2040

Proportion of 65 and over in the state is 21%

Proportion of population 65 and older will increase in the next 20 years

Projected change in population 65 and older (2020 to 2040)

There will be more growth around the urban areas and the rural counties will lose population.

Projected change for the state is 50%.

There is more migration of people 60 and older to metropolitan areas

Source: U.S. Census Bureau, American Community Survey 2016-2020, 5-year estimates. Table B07001: Geographical mobility in the past year by age for current residence in the United States, [https://data.census.gov/cedsci/](https://data.census.gov/cedsci/)
Following pandemic-related data collection disruptions, the Census Bureau revised its methodology to reduce nonresponse bias in data collected in 2020. After evaluating the effectiveness of this methodology, the Census Bureau determined the standard, full suite of 2016–2020 ACS 5-year data are fit for public release, government and business uses.

Due to this adjustment in methodology and 2020 changes to race and ethnicity questions and coding, users should use caution when comparing the 2016-2020 ACS with earlier ACS releases.
Population 65 and older is largely **White**

Race/Ethnicity

- **White**: 78.9%
- **Black or African American**: 16.8%
- **American Indian and Alaska Native**: 0.9%
- **Asian**: 1.5%
- **Some other race**: 1.0%
- **Two or more races**: 0.9%
- **Hispanic or Latino origin (of any race)**: 2.1%

Keeping older adults in the workforce:
- Change bias and attitude towards older workers
- Design phased retirement programs
- Provide flexible roles and schedules
- Allow part-time work/telecommuting
- Retirement options
- Ongoing training to master new skills
- Invest in wellness programs
- Implement strategies to help aging workers balance work and caregiving roles
Social Security is the primary source of income for adults 65 and older

* Group quarters population: people not living in households and includes institutionalized and non-institutionalized population
  - **Institutionalized**: correctional institutions, nursing homes, psychiatric hospitals, in-patient hospice facilities, etc.
  - **Noninstitutionalized**: military quarters, group homes, emergency and transitional shelters for homeless people, etc.

* As % of population 65 and older in group quarters

Source: U.S. Census Bureau, American Community Survey 2016-2020, 5-year estimates. Table S2601A: Characteristics of group quarters population, [https://data.census.gov/cedsci/](https://data.census.gov/cedsci/)
Marital Status of adults 65 and older

More women are widowed and live alone in older age

Now Married, Except Separated Includes people whose current marriage has not ended through widowhood, divorce, or separation (regardless of previous marital history). The category may also include couples who live together or people in common-law marriages if they consider this category the most appropriate. "now married" does not include same-sex married people even if the marriage was performed in a state issuing marriage certificates for same-sex couples.

Separated Includes people legally separated or otherwise absent from their spouse because of marital discord. Those without a final divorce decree are classified as "separated."

Opioid related deaths among adults 60 and older, SFY 2021

Number of opioid related deaths have increased by **28%** since 2018

Number of deaths by gender
- Male: 96
- Female: 37

Number of deaths by race
- White: 89
- Black or African American: 37
- American Indian: 4
- Unknown: 3

Number of deaths by age group
- 60-69: 118
- 70-79: 14
- 80+: 1

Source: NC Division of Public Health, Office of the Chief Medical Examiner, provisional results
Health Effects of Social Isolation and Loneliness

• An estimated 1 in 4 adults aged 65 and older live alone
• An estimated 42% of adults 65 and older are unmarried (widowed, never married or divorced)
• Research links social isolation and loneliness to higher risks of:
  - Premature Mortality
  - Blood pressure and heart disease
  - Chronic health conditions
  - Depression and anxiety
• Increased Medicare Spending
• Many aging services address isolation and promote well-being

Note: Social isolation is the objective physical separation from other people (living alone), while loneliness is the subjective feeling of being alone or separated
Older adults and civic engagement
AmeriCorps Seniors Programs in North Carolina, 2020

More than **2,700** North Carolinians aged 55 and older participated in programs

- **Foster Grandparent Program**
  - 627
- **Retired Senior Volunteer Program (RSVP)**
  - 1,810
- **Senior Companion Program**
  - 290

Reported health benefits after one year of volunteering:
- Decrease in anxiety and depression
- Decrease in loneliness and social isolation
- Enhanced physical activity
- Higher life satisfaction

Life expectancy has increased

For example, if you are 62 years old, you are expected to live to 85 years

*Life expectancy* is the average number of additional years that someone at a given age would be expected to live if current mortality conditions remained constant throughout their lifetime.

Glossary
Disability - A long-lasting physical, mental, or emotional condition that makes it difficult for a person to do activities such as walking, climbing stairs, dressing, bathing, learning, or remembering.

Household - A household includes all the people who occupy a housing unit as their usual place of residence. Household types are arranged into 2 groups. A family household contains at least 2 persons, the householder and at least 1 other person related to the household by birth, marriage or adoption. A nonfamily household may contain only one person, the householder or additional persons who are not relatives of the householder.

Householder - The person, or one of the people, in whose name the home is owned, being bought, or rented.

Income - "Total income" is the sum of the amounts reported separately for wages, salary, commissions, bonuses, or tips; self-employment income; interest, dividends, net rental income, royalty income, or income from estates and trusts; Social Security or Railroad Retirement income; Supplemental Security Income (SSI); any public assistance or welfare payments from the state or local welfare office; retirement, survivor, or disability pensions; and any other sources of income received regularly such as Veterans' (VA) payments, unemployment compensation, child support, or alimony.

Labor force - The labor force includes all people classified in the civilian labor force, plus members of the U.S. Armed Forces (people on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard). The Civilian Labor Force consists of people classified as employed or unemployed.

Marital Status: Now Married, Except Separated Includes people whose current marriage has not ended through widowhood, divorce, or separation (regardless of previous marital history). The category may also include couples who live together or people in common-law marriages if they consider this category the most appropriate. In certain tabulations, currently married people are further classified as "spouse present" or "spouse absent." In tabulations, unless otherwise specified, "now married" does not include same-sex married people even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Separated Includes people legally separated or otherwise absent from their spouse because of marital discord. Those without a final divorce decree are classified as "separated." This category also includes people who have been deserted or who have parted because they no longer want to live together, but who have not obtained a divorce.
Median income - The median income divides the income distribution into two equal groups, one having incomes above the median, and other having incomes below the median.

Metropolitan Area - A metro area contains a core urban area of 50,000 or more population. Each metro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.

Poverty: The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is in poverty. If the total income for a family or unrelated individual falls below the relevant poverty threshold, then the family (and every individual in it) or unrelated individual is considered in poverty. The poverty threshold (2020) for a person 65 and older is $12,413 and for two people (householder aged 65 and older) is $15,644.

Race/Ethnicity: The Census Bureau collects racial data in accordance with guidelines provided by the U.S Office of Management and Budget. The data is based on self-identification in which residents choose the race or races with which they most closely identify. Hispanic or Latino refers to an ethnic category, a person of Cuban, Mexican, Puerto Rican, South or Central American or other Spanish culture or origin regardless of race.

Rural: All territory, population, and housing units located outside of urbanized areas and urban clusters.

Urban: For the 2010 Census, an urban area will comprise a densely settled core of census tracts and/or census blocks that meet minimum population density requirements, along with adjacent territory containing non-residential urban land uses as well as territory with low population density included to link outlying densely settled territory with the densely settled core. To qualify as an urban area, the territory identified according to criteria must encompass at least 2,500 people, at least 1,500 of which reside outside institutional group quarters.

Definitions of other terminology used in the report are available in the glossary of American Community Survey at: http://factfinder.census.gov/home/en/epss/glossary_a.html
