Reminders about imported formula:

The FDA is allowing the import of additional brands of infant formula during the shortage. The formulas included on this table may be available on store shelves and are temporary options when Gerber Good Start Gentle Powder is not available.

- Follow the mixing instructions on the product label. These instructions may be very different from what you are used to. Some instructions will be in metric units. For more information, review the FDA's [Tips for Preparing Imported Infant Formula](#).
- Do not try to import formula yourself, because you can't be sure it meets U.S. safety standards. Rely on what has been approved by the FDA. Contact your pediatrician if you are unsure if a formula has been properly imported.
- Imported formulas may be labeled as "Stage 1" (for the first six months after birth, but generally can be used throughout the first year), and "Stage 2" (just for babies who are over 6 months of age).
- The [American Academy of Pediatrics](#) also has helpful guidance on using imported formula.
- For additional information, visit the [FDA's Imported Formula website](#).
