NC DEPARTMENT OF HEALTH AND HUMAN SERVICES

North Carolina Cases by Date of Symptom Onset (n=99*)

*Symptom onset date is missing for 12 cases. Data will be updated as additional information becomes available

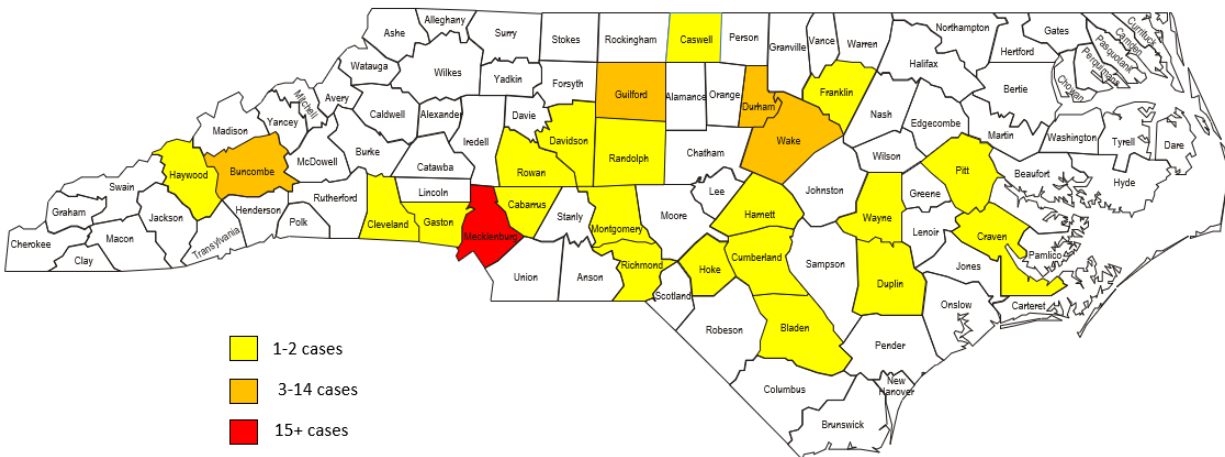

Figure 1 Counties affected as of August 8, 2022

Includes data available as of **August 8, 2022, at 5:00 pm**. Nearly all monkeypox cases in North Carolina have been in men who have sex with men, consistent with findings from other jurisdictions. Gender is self-reported. Data are provisional and subject to change as new information is received.
