

Becoming a Jynneos Provider

Thank you for your interest in becoming a Jynneos vaccine provider!

Please note that vaccine supply is currently very limited. Select local health departments and partners have been chosen to administer the vaccine supply currently available, and additional providers are being added as vaccine supply increases.

Step 1

Take the [NCDHHS Monkeypox Vaccine Enrollment and Capacity Survey](#).

Step 2

Upon completing the survey, NCDHHS will review the information and notify you of approval.

Step 3

Once approved, you can request JYNNEOS or transfers, and manage your inventory, in NCIR. For more information on requesting doses, [click here](#).

What is NCIR?

The North Carolina Immunization Registry (NCIR) is a secure, web-based clinical tool which is the official source for North Carolina immunization information. Immunization providers may access all recorded immunizations administered in North Carolina, regardless of where the immunizations were given.

The purpose of NCIR is:

- To give patients, parents, health care providers, schools and childcare facilities timely access to complete, accurate and relevant immunization data;
- To assist in the evaluation of a child's immunization status and identify children who need (or are past due for) immunizations; and
- To assist communities in assessing their immunization coverage and identifying areas of under-immunization.

For more information on NCIR, [click here](#).
