Featured Programs

Therapeutic Leisure Program
O’Berry’s residents have available to them a wide array of year round activities and events to promote mental, social and physical health. The Recreational Therapists, Senior Activities Staff, Leisure Specialists, Technicians and the Chaplain work tirelessly to promote a variety of adaptive activities to encourage and support physical movement, socialization and mental well-being within the context of a healthy life-style.

Palliative Care
As the end of life draws near, O’Berry recognizes the need to provide care for residents in familiar surroundings and in close contact with their family members, friends, and concerned staff. The interdisciplinary team plans individualized palliative care along with the resident and family/guardian to accommodate and honor the resident’s choices and rights; manage pain, comfort, mental and psychological symptoms and meet the resident’s spiritual needs. This program is designed to address the needs of residents with end of life medical issues.

Volunteer Opportunities
Individuals as well as community, civic groups, churches, and service organizations are encouraged to volunteer and become involved with the people who live at O’Berry Neuro-Medical Treatment Center.

YOUR support is greatly appreciated!
*Provide Musical Entertainment
*Provide Spiritual Awareness
*Participate in Special Activities/Events
