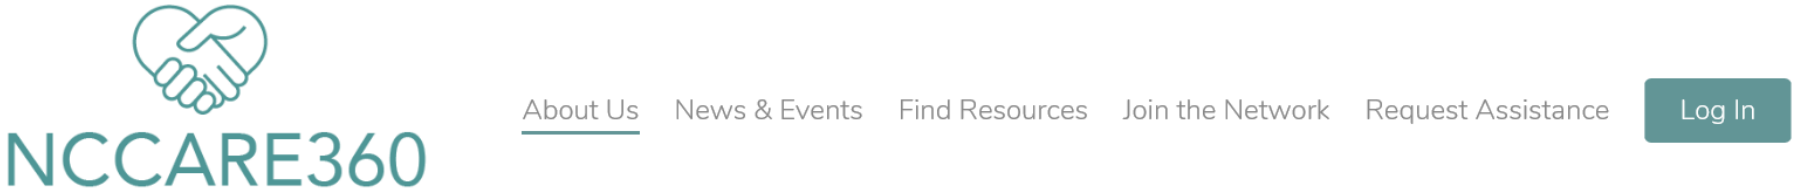
December			$ -			$ -
January			$ -			$ -
February			$ -			$ -
March			$ -			$ -
April			$ -			$ -
May			$ -			$ -
June			$ -			$ -

Community Resources



About NCCARE360

NCCARE360 is the first statewide network that unites health care and human services organizations with a shared technology that enables a coordinated, community-oriented, person-centered approach for delivering care in North Carolina. NCCARE360 helps providers electronically connect those with identified needs to community resources and allow for feedback and follow up. This solution ensures accountability for services delivered, provides a "no wrong door" approach, closes the loop on every referral made, and reports outcomes of that connection. NCCARE360 will be available in all 100 counties by the end of 2020, statewide in North Carolina.

NC Behavioral Health Services-CHCs

- NCCHCA Behavioral Health Workgroup

Workgroup of behavioral health providers, administrators, and staff from FQHCs and partner organizations.

The Behavioral Health Workgroup meets quarterly to discuss behavioral health and to contribute ideas, experiences and share best practices.

NCCHCA

BEHAVIORAL HEALTH PERFORMANCE MEASURES

Depression Screening and Follow-up: This performance measure requires health centers to report the number of patients age 12 and older screened for depression and receiving a follow-up plan (if diagnosed).

SCREENING TOOLS FOR DEPRESSION

SCREENING TOOLS FOR BEHAVIORAL HEALTH DISORDERS BY AGE GROUP

Screening, Brief Intervention and Referral to Treatment: Health centers annually report this performance measure, as well as other substance abuse counseling and treatment services. SBIRT identifies, reduces, and prevents substance abuse.

SCREENING, BRIEF INTERVENTION AND REFERRAL TO TREATMENT

WHAT IS SCREENING, BRIEF INTERVENTION AND REFERRAL TO TREATMENT

Behavioral Health Models- Primary Care

- **Coordinated Care:** Coordinated care primary care and behavioral health providers communicate about shared patients, but maintain separate facilities and systems
- **Co-Located Care:** Co-located care includes basic collaboration onsite, or close collaboration with some systems integration.
- **Integrated Care:** Providers jointly plan and execute goals, develop integrated care plans, co-manage patients, and maintain shared schedules. Integrated practices use a systematic clinical approach to identify patients who are in need of behavioral health services and engage both providers and patients in shared-decision making.

Examples of Coordinated Services

- **Program for All-Inclusive Care for the Elderly (PACE)**
- **Wraparound Programs**
- **Community HUB Model**
- **Community Health Workers Model**
- **Nurse-Family Partnership Model**
- **Health Homes Model**
- **Mobile Unit Model**
- **Tele psychiatry**
