

Agencies Who Completed the NCI-AD State of the Workforce Survey

The State of North Carolina launched the *National Core Indicators – Aging and Disabilities (NCI-AD) State of the Workforce Survey* for North Carolina, led by the NCDHHS Division of Aging. This survey's purpose was to gather data on the direct service and direct support workforce across the state to better understand challenges, trends, and opportunities. The State of the Workforce Survey is a unique opportunity to shape the future of North Carolina's direct care workforce. We would like to show our appreciation for the following agencies for completing the survey and helping us make North Carolina a better place to age.
