Memorandum Of Understanding and Agreement

NC Disability Determination Services—Professional Relations Office Po Box 243 Raleigh, NC 27602

Disability Determination Services is a state agency which helps the Social Security Administration determine eligibility for disability benefits under SSA's Disability Insurance and Supplementary Income programs.

We regard consultative examiners as independent providers. You are not under contract with nor an employee of either the state or federal government. However, this memorandum states the basic areas of our operation to which you need to indicate understanding and agreement. These are:

- 1. <u>Civil Rights Act</u> Acceptance of our referrals signifies full compliance with Title VI of the Civil Rights Act of 1964, that no person shall on the grounds of handicap, race, color, creed or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity. All claimants must be accorded courteous, ethical, and competent examinations.
- 2. <u>Fee Schedule</u> Our fees are negotiated on a "usual and customary" basis, subject to maximums set by the Disability Determination Section. There is a \$35 reimbursement fee for broken/missed appointments.
- 3. <u>Ancillary Studies</u> We usually pre-authorize basic ancillary studies, such as x-ray. If you feel any study not pre-authorized is needed, you or your staff must telephone before performing the study to discuss the justification for such, or payment cannot be guaranteed. Claimants cannot be charged for unauthorized studies.
- 4. <u>Timeliness of Reports</u> Because our claimants are not working, Social Security has mandated time claims decisions. The goal for receipt of your typed report is ten (10) days from the examination. Payment may not be made for reports received after 30 days. We cannot continue to refer to providers who cannot furnish timely reports.
- 5. Report Content Examination reports must conform to requirements in "Disability Evaluation under Social Security... A Handbook for Physicians", and to other guidelines which may be developed. Quality Assurance reviews will be performed periodically with appropriate feedback. The report must contain a medical source statement about the claimant's ability to do work related activities. The report should be detailed, but without unnecessary verbiage serving no real purpose.
- 6. <u>Original Signature</u> The physician, psychologist or other provider must sign the report with original signature. Rubber stamp or similar signatures or those entered by a secretary or other person are not acceptable.
- 7. Release of Information Confidentiality The Social Security Act and its implementing Regulation No. 1 (42 U.S.C. 1306; 20 CFR 401) prohibit the unauthorized disclosure of information obtained in the administration of Social Security programs and make such disclosure a crime. These prohibitions extend to any background data furnished to the provider in conjunction with the performance of the services contracted for herein, and to any reports generated as a result of providing such services, including any copies of such reports retained by the provider. Unauthorized disclosure of such reports by the provider is prohibited. Should referral of an individual, or data pertaining to an individual, to any third party provider (for additional diagnostic studies, clerical or transcription services, messenger services, etc.) become necessary in providing services contracted for herein, such third-party provider must be made aware that services are being performed in conjunction with a Social Security program, and that improper disclosure of information about the subject individual is prohibited
- 8. Responsiveness to Staff Sometimes our staff may need to ask you to clarify or amplify your report. Social Security regulations state that providers must be responsive to such contacts or it may be necessary to seek other sources.

North Carolina Disability Determination Services Specific Report Requirements

Medical Consultation – Complete History and Physical

This guide has been prepared to assist you in providing the information that is important for you to cover in your evaluation. Your report and summary need not be restricted to this general guideline. DDS disability specialists and/or medical consultants evaluating the disability claims do not examine the applicants and are dependent on your comprehensive, objective reports. We welcome your comments and observations, as we may not be aware of additional impairments discovered during the exam.

Patient History

- 1. Chief Complaint(s)
- 2. History of present illness and date of onset. Include source of history and estimated reliability of information provided.
 - a. Progression of symptomatology, with dates of significant changes.
 - b. Report of the disabling condition's effects on activities of daily living. The patient's description of how the impairment affects ability to carry out physical activities such as tolerance for walking distance, tolerance for standing, mobility and ability to grasp and manipulate objects.
 - c. Treatment and response. Include dates and kind of treatment, current medication and therapy, and hospitalizations.
- 3. Past Medical History
 - a. Dates and nature of injuries and operations.
 - b. Dates and circumstances of hospital admissions.
- 4. Social and Family History
 - a. Social history should contain presence or absence of tobacco, alcohol and/or non-prescribed drug abuse.
 - b. Family history should provide information on pertinent positive abnormalities in family, particularly those involving hereditary familial conditions.

Review of Systems

All body systems should be reported in detail. Do not limit description to normal or abnormal. Specific complaints should be described in detail. Where there are no specific complaints for a particular body system, report the normal findings.

Physical Examination

- Vital signs, height and weight <u>without</u> shoes. (Please state "Ht and Wt obtained without shoes" in dictated report) Report cuff size with blood pressure.
- Visual acuity by Snellen chart with glasses for OD (right eye only), OS (left eye only), and OU (both eyes together).
- Describe the patient's general appearance, posture, gait, and observations during the course of the examination, e.g. how claimant gets on and off the examination table.
- HEENT: Report should provide description of each with any negative or normal findings so stated. Any positive findings must be fully described. Funduscopic examination findings must be included.
- CARDIAC: Description of heart size by percussion, the rate, rhythm, and heart sounds including any murmurs. Describe the presence
 or absence of any signs of vascular congestion such as tender hepatomegaly, dependent peripheral edema, basilar rales and
 pulmonary edema, hepatojugular reflex, distended neck veins. Where chest pain is indicated, a complete description is needed
 including:
 - a. What precipitates the pain (the activity and other factors). Does the pain occur at rest, during sleep, or after eating?
 - b. What is its duration (in minutes and hours)?
 - c. What relieves the pain (rest, nitroglycerin)?
 - d. What is its location and radiation?
 - e. What is its quality or character (burning, squeezing, pressure, crushing or sharp, rhythmic, stabbing)?
 - f. Is it reproducible upon repeating similar activity?
 - g. Have other gastrointestinal tract or musculoskeletal origins been considered?
- PULMONARY: Describe breath sounds, dullness, wheezes, rales or coughs. Note prolonged expiration, use of accessory muscles for breathing, and whether pallor, cyanosis, hoarseness and clubbing of fingers are present. Record abnormal clinical findings and pertinent normal findings, if there are complaints relative to this area.
- ABDOMEN: Report any objective evidence of organomegaly, masses, tenderness, ascites, etc.
- EXTREMITIES: Report the clinical evidence of chronic venous obstruction or arterial insufficiency, superficial varicosities, extent/size of ulceration, degree of brawny edema. Description of pulses. If ulceration is present, ascertain from the history whether the ulcer

has been persistent for 3 months, despite therapy.

- MUSCULOSKELETAL: Report any redness, swelling, atrophy, scarring, surgical scars, drainage sites, anatomic deformity, spasm or tenderness. Range of motion in degrees of both active and passive range of all joints, including spine, should be described. Report straight leg raise in both sitting and supine positions.
 - a. Coordination: Describe ability to get up from chair, get on/off exam table, heel/toe, squat/rise, tandem walk, make a fist, oppose finger to thumb, pinch grasp and manipulate large and small objects (pick up a coin, button clothes, write, turn door knob, sort/handle papers, etc) Comment on effort and cooperation.
 - b. Muscle Bulk: Describe any muscle atrophy and provide circumferential measurement of the affected and the contralateral limb. In hand atrophy describe the thenar, hypothenar and interosseous muscles and, if possible, give three serial dynamometer grip strength measurements, bilaterally.
- NEUROLOGICAL: Report description of any neurological deficits. Statements regarding weakness, reflex changes and sensory deficit should be quantified and remaining muscle strength described. Provide grip strength and muscle strength in the upper and lower extremities on a scale of 0-5. When aphasia exists, a comment regarding ability to speak effectively should be made. Describe pinprick, sharp, light touch, vibratory, proprioception testing. Provide dermatomal distribution if loss is present. Describe reflexes on a 0-4+ scale. Describe balance while standing and walking.
- OBESITY: When obesity exists, report how it affects ability to walk, sit, stand and any resultant shortness of breath and fatigue.
- RECTAL and PELVIC: Omit, unless indicated. If indicated, chaperone must be present.
- TEST RESULTS: Following the history and physical, the reports of any laboratory and/or x-ray studies should be given.
- If a hand-held assistive device (AD) is used, describe gait with and WITHOUT the AD (unless medically contraindicated). Who
 prescribed the AD? When? Why? Is the AD used to walk inside the home? Comment whether the AD is required continuously, only
 outdoors, on uneven surfaces, for balance, pain. Describe, in detail, the objective musculoskeletal, neurological, and/or circulatory
 findings which require the use of AD.

Summary

Diagnosis and Prognosis: The etiology (or probable etiology) and diagnosis are needed as well as comments on the expected duration with and without treatment. The diagnosis should be based on objective, clinical, x-ray and laboratory findings rather than on historical allegations or presumptions.

A medical source statement describing how the impairment(s) affect the ability to sit, stand, move about, lift, carry, handle objects, hear, speak and travel should be provided. Explain how the findings support these limitations.

We **do not require** a statement as to whether the patient **is** or is not disabled because the determination of disability is an administrative decision which also involves consideration of age, education and vocational history.

The report must be reviewed and signed by the physician who actually performed the examination.

Revised October 2016
