

Parental BMI / Physical Presence Waiver

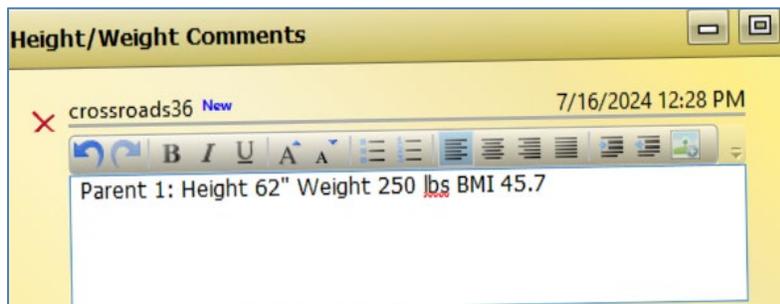

When an infant or child's measurements are deferred because of the Physical Presence Waiver, parental Body Mass Index (BMI) information cannot be saved into Crossroads and therefore Risk Code 114 (At risk for overweight based on parental BMI) will not be system-assigned. Use the below guidance to generate Risk Code 114.

On the **Anthro/Lab** screen, in the **Height/Weight** container, select the **Parental BMI Information** button **BEFORE** selecting *Deferred Reason: Physical Presence Waiver*. Enter parental Height and Weight in the **Parental BMI Information** container. Crossroads will calculate the Parental BMI. Select **OK**.

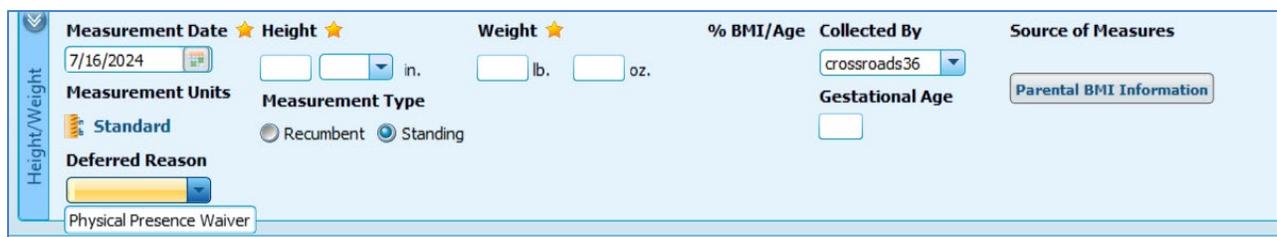

The screenshot shows a dialog box titled "Parental BMI Information". It contains two sections for "Parent 1" and "Parent 2". Each section has fields for Height (in inches), Weight (in pounds and ounces), and BMI. For Parent 1, the Height is 62 inches, Weight is 250 lbs, and BMI is 45.7. For Parent 2, the fields are empty. There are "OK" and "Cancel" buttons at the bottom right.

Use the **yellow sticky note** to document the Parental BMI Information.

The screenshot shows a yellow sticky note titled "Height/Weight Comments". It contains a text entry: "Parent 1: Height 62" Weight 250 lbs BMI 45.7". The text is formatted with bold tags for "Weight" and "lbs". The sticky note also shows a timestamp "7/16/2024 12:28 PM" and a user name "crossroads36".

Next, select **Deferred Reason of Physical Presence Waiver**:

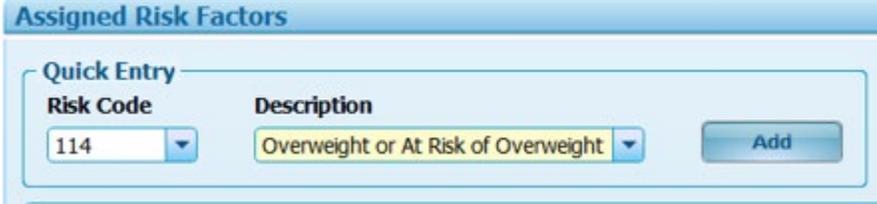

The screenshot shows the "Height/Weight" measurement form. It includes fields for Measurement Date (7/16/2024), Height, Weight, % BMI/Age, Collected By (crossroads36), and Source of Measures (Parental BMI Information). The Measurement Type is set to Standard, and the Deferred Reason is Physical Presence Waiver. The Parental BMI Information button is greyed out.

After selecting **Physical Presence Waiver**, the **Parental BMI Information** button is greyed out and the height and weight entered to calculate the BMI is deleted. The information is saved in the yellow sticky note.

Finish any additional entry on the **Anthro/Lab** screen (**Bloodwork** and/or **Lead Test** containers). Select **Save**.

Parental BMI / Physical Presence Waiver

On the **Assigned Risk Factors** screen, use the **Select Risk Factors** button or the **Quick Entry** dropdown to select the CPA-Assignable Risk Code 114 *Overweight or At Risk of Overweight*, if applicable.

The screenshot shows a software interface titled "Assigned Risk Factors". Below the title is a "Quick Entry" section. This section contains two dropdown menus: "Risk Code" with the value "114" selected, and "Description" with the value "Overweight or At Risk of Overweight" selected. To the right of these dropdowns is a blue "Add" button.
