Quality Management Team
Community Policy Management Section
DMH/DD/SAS
NC DHHS

February 2011

Matched Initial/Update Report

This report provides Initial and Update Interview information gathered through the online North Carolina Treatment Outcomes and Program Performance System (NC-TOPPS). The report is divided into three parts and provides information on the consumer and the treatment received.

I	II	III
Age	Employment	Suicidal thoughts
Gender	Substance misuse	Aggressive behavior
Race/Ethnicity	Legal involvement	Self-destructive
DSM-IV diagnoses	Housing arrangement	Physical violence
Treatment participation	Academic performance	Sexual behaviors
Services needed & received	Barriers to treatment	Health care services

Information for Part I can be obtained by the clinician from the consumer record. The preferred method for completing Part II is a personal interview; however, a telephone interview, clinical records or notes can also be used to gather this information.

Information contained in Part III can only be obtained during a personal interview. If a personal interview is not conducted questions in this section are not asked. Also, a minimum of 20 consumers must complete part III for these data to be reported.

Every data element or response category on the NC-TOPPS interview is not displayed in this report. In production of this report data are cleaned and apparent duplicates removed prior to preparing the tables and charts. Due to this and potential timeframe differences, charts and tables contained in this report may not match those obtained from online queries.

This feedback report is available to the NC Division of Mental Health, Developmental Disabilities and Substance Abuse Services (NC DMH/DD/SAS), Local Management Entities (LMEs), and providers. Additional information about NC-TOPPS and pdf copies of the online NC-TOPPS interviews are located at: <http://nctopps.ncdmh.net/>.

General Information on Interpreting Tables

- Percentage A percentage is the number of clients with a characteristic or behavior divided by all the clients in the group of interest multiplied by 100. Percentages will be designated with a % sign next to the number.
- Missing Data Some of the NC-TOPPS forms entered in the system have a particular item or question left blank. In calculating the percentages in cells of questionnaire items, this missing data is excluded from the calculation. For example, program X may have submitted 50 interviews but in 2 of the interviews, gender was left blank. When the percent of males is calculated, the 25 males are shown as 52% (25/48*100).
- Denominator The denominator for nearly all percentages is the number of cases shown on the bottom left of the page minus item missing data. All exceptions to this general rule are **specifically noted** with appropriate text in the graphic or table. This text will state which group is included or excluded from the denominator, such as "of those in the labor force" or "of those with children."
- Multiple Response "Multiple response" indicates a "mark all that apply" type question in which more than one response to a question is allowed. Total responses may add to greater than 100%. Examples are health insurance or diagnoses. This is in contrast to items such as gender where only a single response is allowed.
- Time periods of behaviors measured Behaviors are measured at several time periods including the past year, the past 6-months, the past 3-months, the past month, or since last interview. For Initial Interviews, the time periods can generally be construed to mean the time period before treatment begins. For Update Interviews the time is measured from the time at which the interview occurs back one month, 3-months, or since the last interview.
- Definitions of terms The Appendix at the end of the report gives definitions of acronyms, abbreviations, and other terms used in this report.
- Notes:** Mental Health consumers who are also being treated for substance abuse (co-occurring) are included in this report.

Statewide Adolescent Mental Health Consumers
Initial Interviews Matched to 3-Month Update Interviews
Initial Interviews Conducted July 1, 2009 through June 30, 2010

Initial Interviews column: Shows the unduplicated number of Initial Interviews conducted July 1, 2009 through June 30, 2010

Updates matched column: Shows the number of consumers who had an Initial Interview who also had a 3-month Update Interview done through December 31, 2010

Percent Matched column: The percent of Initial Interviews that also had an 3-Month Update Interview.

LME	Initial Interviews	Updates Matched	Percent Matched
Alamance-Caswell	135	60	44.4%
Albemarle	179	85	47.5%
Beacon Center	450	252	56.0%
CenterPoint	552	289	52.4%

Southeastern Center	349	230	65.9%
Southeastern Regional	618	394	63.8%
Wake	706	370	52.4%
Western Highlands	519	219	42.2%
Total	10,083	5,582	55.4%

Notes

*Only one admission per consumer is included in this report. Different numbers of Initial Interviews may be shown for 07-08 in other reports.

Part I

This report is based on the 5,582 consumers who had both an Initial and a 3-month Update Interview. The following section describes characteristics of these consumers and their treatment

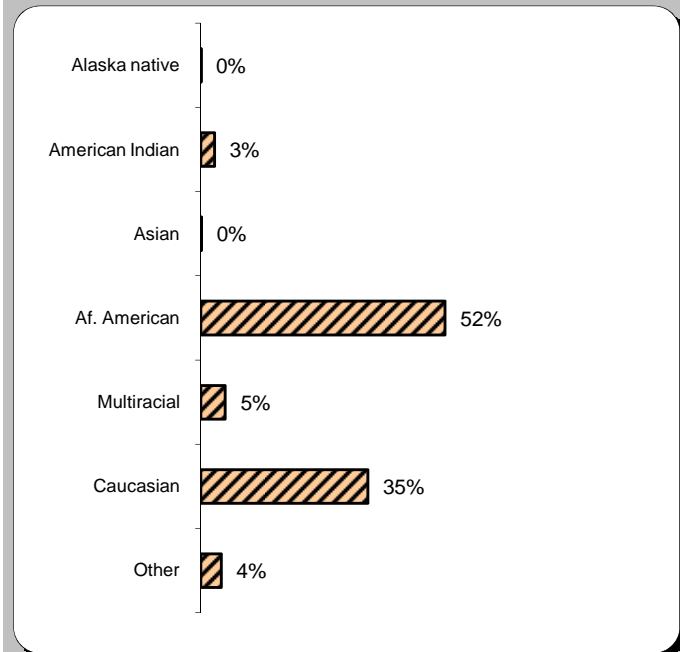

1-1: Days Between Initial and Update Interview

1-2: Gender

Among Statewide consumers, 61% are male, and 39% are female.

1-3: Race/Ethnicity

1-4: Hispanic

7% of Statewide consumers are Hispanic.

1-5: Age Group

1-6: Gender and Age

2-1: Gender and Ethnicity

2-2: Co-Occurring Status at Update

Services/Supports Area	%
Mental health only	91%
Mental health and substance abuse (co-occurring)	9%

2-3: Co-Occurring Consumers: Type of Treatment Professionals Providing Services/Supports

Type of Qualified Professional (QP)	Number
QP in mental health	222
QP in substance abuse	11
QP in both	293
Total Co-occurring consumers	526

2-4: Family Involvement with Treatment Services and Person-Centered Planning the Past 3 Months of Treatment

Family Involvement with...	%
Services and/or planning	96%
Treatment Services	90%
Person-centered planning	90%

2-5: DSM-IV Diagnoses at Update

Diagnostic Category	%
ADD	40%
Oppositional defiant disorder	48%
Major depression	15%
Conduct disorder	16%
Disruptive behavior	8%
Bipolar disorder	9%
PTSD	8%
Anxiety disorder	6%
Drug abuse	10%

Only most common diagnoses shown. Multiple response.

2-6: Attendance at Scheduled Treatment Sessions, During Treatment Since Last Interview

3-1: Services Deemed "Very Important" At Intake and Received During Treatment

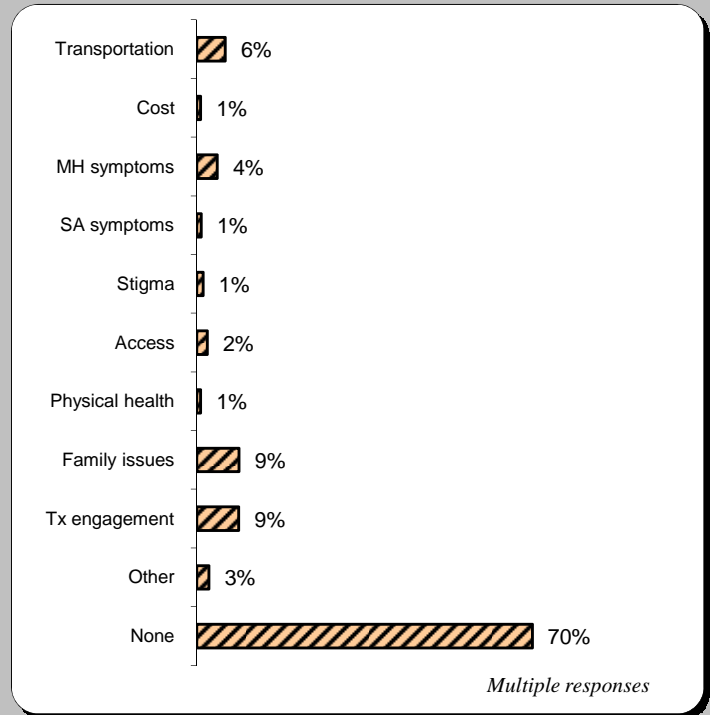

Part II

Some graphs and tables compare information collected at the Initial Interview with information collected in the Update Interview. Initial Interview information is designed to be collected by means of a personal interview with the consumer. The preferred method for completing the Update items in this section is a personal interview; however, a telephone interview, clinical records, and/or notes are also used.

3-2 Update Interview Data Collection Method

3-3 Barriers to Treatment

4-1: Enrollment in Academic Program

Enrolled in....	Initial Interview	Update Interview
Any academic program	93%	93%
Academic School (K-12)	80%	79%
Alternative Learning Program (ALP)	12%	13%
Technical or Vocational School	0%	0%
GED	1%	2%

4-2: Students in K-12 who Received Mostly A's, B's, and C's at Most Recent Grading Period

Of those in K-12	Initial Interview	Update Interview
Received mostly A's, B's, and C's	68%	76%

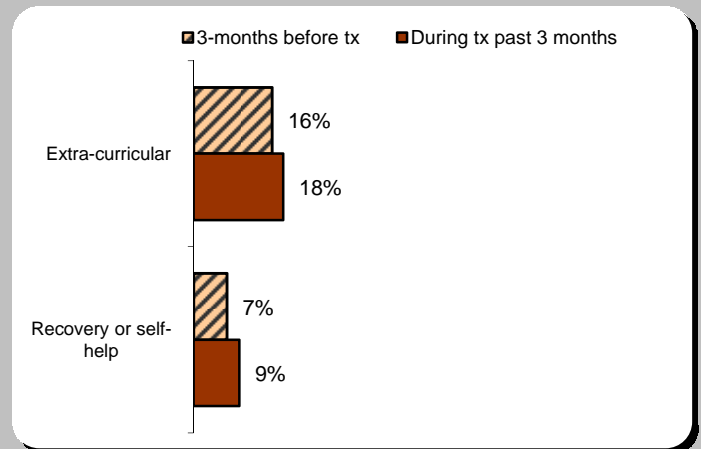

4-3: School Expulsion, Suspension and Truancy

Those enrolled in K-12 who missed school due to	3-months before tx	during tx past 3 months
Expulsion	4%	2%
Suspension	32%	23%
Truancy	14%	10%

4-4: Since starting treatment school attendance is ...

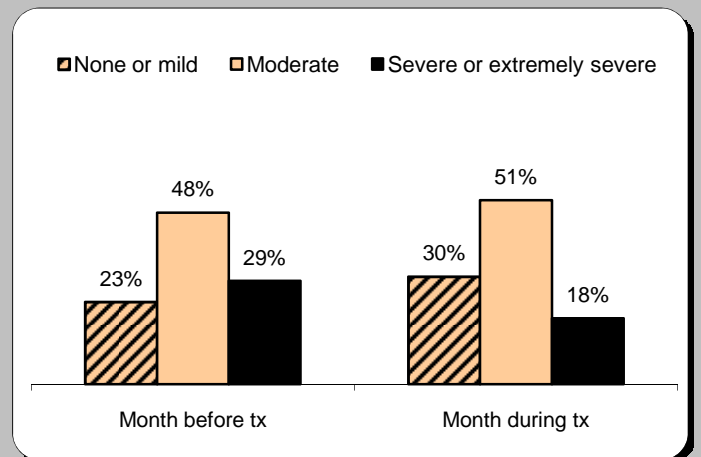

4-5: Consumer Participation in Positive Activities (% participating "more than a few times")

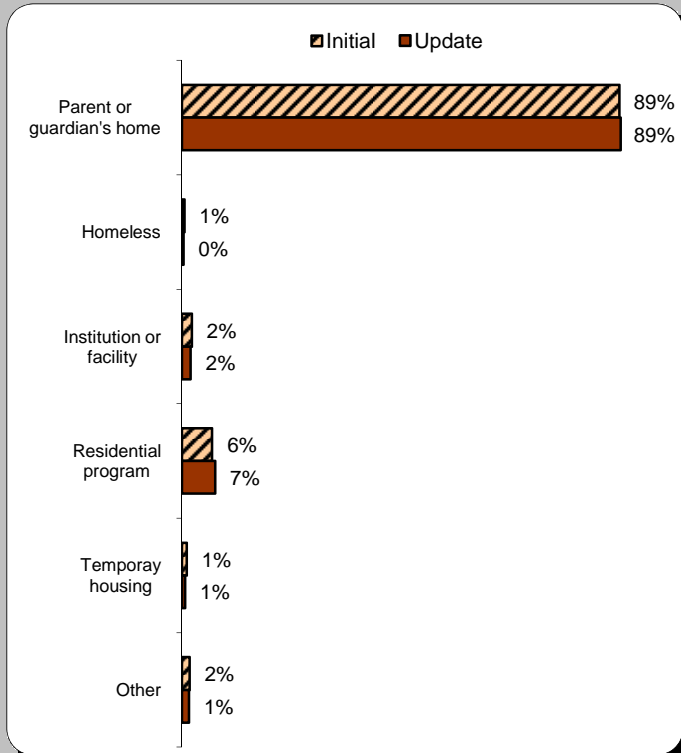

4-6: How Often Problems Interfere with Work,

4-7: Severity of Mental Health Symptoms

5-1: Where Lived

5-2: Number Living in Special Circumstances

Where lived most of time	3 Months before Tx	During tx past 3 mos
Homeless sheltered	24	15
Homeless unsheltered	4	4
Therapeutic foster home	58	86
Level III Group Home	200	200
Level IV Group Home	29	27
State residential treatment center	41	43
SA residential treatment facility	2	8
Total living in special circumstances	358	383
--Of the total, number in home community	136	146

5-3: Times Moved Residences During Treatment, Past 3 Months

None	80%
Once	16%
More than once	4%

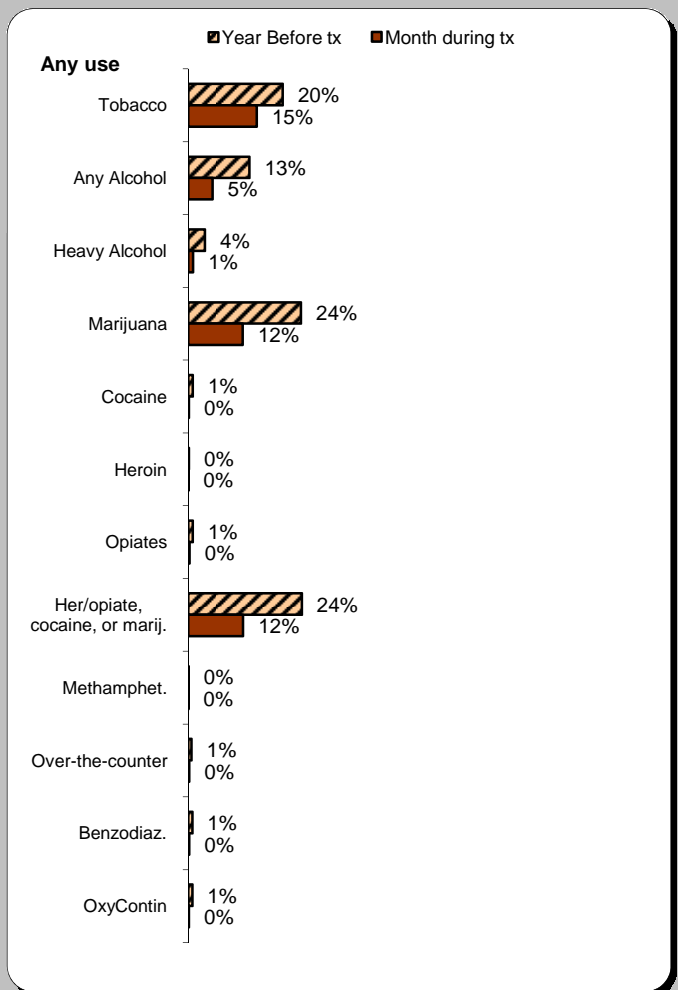

5-Legal Involvement & Arrests

	Month before tx	Past Month
Criminal justice involvement	30%	31%
Got in trouble with the law	16%	11%
Arrested past month	8%	5%

5-5: Psychotropic Medication at Update

50% of Statewide consumers have a current prescription for psychotropic medications. Of those, 78% take their medication as prescribed all or most of the time.

5-6: Substance Use, Year Before Treatment & Past Month

Part III

Questions contained in Part III must be answered by the consumer. If the consumer is not available, these items are skipped and left blank. Therefore, these items often represent the responses of fewer consumers. Also, a minimum of 20 consumers must complete this section for these data to be reported.

*** 3511 of the 5,582 (63%) of Statewide Update Interviews included a personal interview with the consumer.**

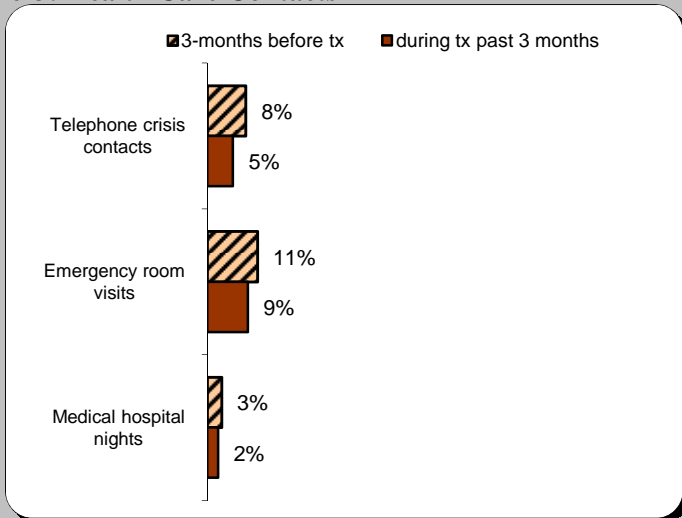

6-1: Behavior Problems and Symptoms

	3 Months before tx	During tx, 3 Months since last before tx interview
Suicidal thoughts	18%	9%
Tried to hurt or cause self pain	12%	7%

6-2: Experienced Violence or Expressed Violence

	3 Months before tx	During tx, past 3 months
Physical violence experienced	32%	24%
Hit/physically hurt another person	48%	34%

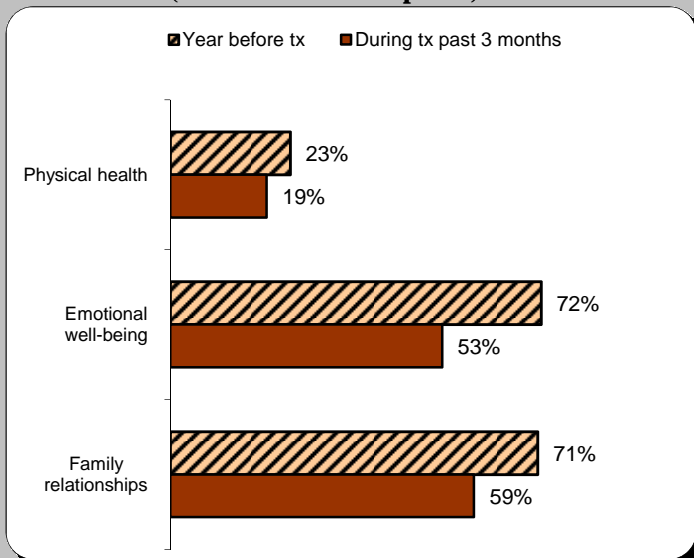

6-3: Health Care Contacts

6-4: Family Somewhat or Very Supportive

	Initial: Expect Support	During tx: Received Support
Family Support	97%	98%

6-5: Consumer Ratings on Quality of Life (% rated "fair" or "poor")

6-6: Helpfulness of Program Services (of those for whom the service is applicable)
