

All Ages, All Stages NC

A Roadmap for Aging and Living Well

Supporting Older Adults and Their Families Quarterly Webinar

Join us for updates on key implementation priorities, progress from subgroups, and a chance for open discussion.

The Supporting Older Adults and Families work group focuses on ensuring that North Carolinians have access to services and resources to age safely at home and in the community, and that family caregivers receive meaningful support.

Unlike other work groups, this group does not have standalone All Ages, All Stages NC subgroups. Instead, its work builds on and strengthens existing cross-agency and partner-led efforts that align with the plan's priorities, particularly around long-term services and supports, caregiving, and coordinated systems of care.

Wednesday, July 30th 10:00-11:30 AM

Featured Presentation: Deep Dive into the NC Caregiving Collaborative

This session will spotlight the NC Caregiving Collaborative's efforts to strengthen support for family caregivers statewide. Formed from the NC Serious Illness Task Force, the Collaborative brings together partners across government, health care, advocacy, and academia. The presentation will highlight connections to national priorities, including the RAISE Family Caregiving Report, and explain how the Collaborative's projects, such as a statewide caregiver landscape analysis and Medicaid advocacy, tie directly to All Ages, All Stages NC implementation. Opportunities for input and engagement will be shared.
